

Dyson Beasley Agility Workshops 3 – 6 July 2018

Dogs ACT is excited to offer Agility Workshops with well-known New Zealand handler, trainer, and judge - Mr Dyson Beasley. The workshops will be held July 3 - 6 2018 in the lead up to the EPIC - Advance Dog Sports Extravaganza weekend!

Novice level skills, course walking and handling

Tuesday 3rd July 2018 (9.00am – 5.00pm)

For dogs and handlers who are either nearly ready, already training or competing at Novice Level.

Learn more handling skills and build on the skills you already have. In this course you will not only look at some handling that you already know but will pick up some new ones as well. We'll look at your timing, your position on the ground, your motion and most importantly your connection with your dog and how to transfer all of that to your dog as information going forward and trying out your skills on the novice courses.

Excellent/Masters level skills, course walking and handling

Wednesday 4th July 2018 (9.00am – 5.00pm) & Thursday 5th July 2018 (9.00am – 5.00pm)

For dogs and handlers training or competing at Excellent/Masters Level

In this session you'll work on various handling skills, learn more about walking courses, looking at all your options as a handler and then making educated decisions for you and your dog. You'll also be looking at not only the dogs path but the handlers path as this may and will vary for every dog, choosing handling options again that will suit your dog to maintain the best line around a course. The big focus will be put on your connection with your dog, are you connected? Are you supporting every obstacle as well as the correct handler motion? All these things are very important to maintain running as a team at today's Level. You will be tested while supported within a Masters Course.

Excellent/Masters workshops are independent of each other and handlers may choose to do either or both days.

Increasing independent contacts

Friday 6th July 2018 (9.00am – 1.00pm)

Want to increase your dog's independent contacts? This session will focus on just that.

Contacts - Drive, understanding, problem solving, independence all these things will make your job a whole lot easier.

To register for a workshop fill in the online form available via the Dogs ACT website
